

Motorcycles

We Don't Get

- 125cc Single Cylinder, 15-ish HP
- 6-Speed Transmission
- Showa fork, same used on the CB650R
- Can get up to 100mpg
- 75 MPH top speed
- Again, better alternative to the Grom/Z125/TNT 135?

Honda CB125R

- 689cc Parallel Twin, 74 HP
- Same motor used in MT-07, XSR700, US edition of Tenere 700
- Unique color scheme, Akrapovic exhaust
- Potentially could come to US?
“Standard” edition is already here

Yamaha Tenere

700 Rally Edition

- Based on current W800 model (available in North America)
- 773cc Vertical Twin motor, 51 hp & 44 lb-ft of torque
- Reviving the name that helped launch Kawasaki motorcycles
- Like the W800, slightly offset firing order

Kawasaki Meguro

K3
